Córdoba, Argentina

Facundo Nicolas Guzmán Olariaga

Backend developer

My experience lies in creating comprehensive applications, with a current focus on the Frontend, although my true passion lies in Backend development. Currently studying the Bachelor of University Technician in Programming at the UTN-FRC faculty, my academic career is aimed at widely specializing in the backend domain.

My professional experience covers both the development of independent projects and collaborative team work, showing my ability to excel in diverse environments. This unique combination of individual and team projects has honed not only my technical skills but also my interpersonal skills, making me an outstanding candidate.

MOST RECENT WORK EXPERIENCE

Backend - No-Country

August - October · 1 month [startup that helps generate employability opportunities for inexperienced developers]

RESPONSIBILITIES

- **Adopts:** actively learns and adopts the technology and tools defined by the team
- **Supports:** proactively supports other team members and helps them to be successful
- **Learns:** quickly learns from others and consistently steps up when it is required
- **Specializes:** is the go-to person for one or more technologies and takes initiative to learn new ones
